Angels of Death (Space Marines): CL Werner, Christian Dunn ...

Space Marines: Angels of Death: The book as a whole was well done, and well formatted (especially for containing 31 short stories!). I really liked the intro, and the short Foundation page at the start of each section of stories. As the enemies of Humanity rise and gather, the Space Marines will be there to meet them with bolters primed and chainswords screaming. Each Space Marine is a genetically-engineered master of combat, sworn to perform his duty to the Emperor until victory... or death.

The worlds that the Space Marines recruit from often have a wide range of legends regarding the Adeptus Astartes. As many of the communities in question are primitive or barbaric, the people regard the Space Marines as otherworldly figures, "angels of death" who arrive once in a generation to test them and carry away their strongest sons.
