Api 521 5th Edition

ANSI/API STANDARD 521 FIFTH EDITION,
JANUARY 2007 ISO 23251 (Identical), Petroleum and
natural gas industries—Pressure-relieving and
depressuring systems. Addendum 1 to Pressure-
relieving and Depressuring Systems Section 5.15.7.4
Liquid cooling service

Pressure-relieving and Depressuring Systems - API
In the API 521 (fifth edition, para 5.14.4.1), there is a
formula to calculate the final pressure of trapped liquid
for thermal expansion case. I have two questions; I
want to use this formula and justify that for my case,
athermal relief valve is not required due to huge
difference between maximum operating pressure (3.5
barg) and design pressure (100 barg) of pipe.
