

Continental 4 Cylinder Flathead Engine Parts

Continental has eight basic four-cylinder and ten six-cylinder L-Head type engines, ranging in size from 56 to 427 cubic inch displacement. The combustion chamber design has been tailored for the required turbulence, charge flow and burning characteristics to provide dependable and economical heavy duty service.

I recently purchased a 1928 (I think) Childs Fire Engine with a Selden chassis. It has a Continental flathead 6 cylinder in it with engine number 6B-2614. Can anyone give me some info on this engine such as displacement, horsepower, etc.?
