

Ing Library Books To Kindle Paperwhite

The book ecosystem is radically changing, and libraries must change with it. This book tackles the controversial discussion about eBooks and explores librarian-driven solutions and visions for the future of libraries in the 21st century.

"The theme of the 2011 Charleston Conference, the annual event that explores issues in book and serial acquisition, was "Something's Gotta Give." The conference, held November 2-5, 2011, in Charleston, SC, included 9 pre-meetings, more than 10 plenaries, and over 120 concurrent sessions. The theme reflected the increasing sense of strain felt by both libraries and publishers as troubling economic trends and rapid technological change challenge the information supply chain. What part of the system will buckle under this pressure? Who will be the winners and who will be the losers in this stressful environment? The Charleston Conference continues to be a major event for information exchange among librarians, vendors, and publishers. As it begins its fourth decade, the Conference is one of the most popular international meetings for information professionals, with almost 1,500 delegates. Conference attendees continue to remark on the informative and thought-provoking sessions. The

Conference provides a collegial atmosphere where librarians, vendors, and publishers talk freely and directly about issues facing libraries and information providers. In this volume, the organizers of the meeting are pleased to share some of the learning experiences that they--and other attendees--had at the conference"--

Have changes such as cloud computing, search engines, the Semantic Web, and mobile applications rendered such long-standing academic library services and functions as special collections, interlibrary loans, physical processing, and even library buildings unnecessary? Can the academic library effectively reconceive itself as a virtual institution?

Stielow, who led the library program of the online university American Public University System, argues most emphatically that it can. His comprehensive look at web-based academic libraries synthesizes the changes wrought by the Web revolution into a visionary new model, grounded in history as well as personal experience. He demonstrates how existing functions like cataloging, circulation, collection development, reference, and serials

management can be transformed by entrepreneurship, human face/electronic communicator relations, web apps, and other innovations. Online education can ensure that libraries remain strong information and knowledge hubs, and his timely book Shows how the origins and history of the academic library have laid the foundation for our current period of flux Identifies practices rooted in print-based storage to consider for elimination, and legacy services ready to be adapted to virtual operations Discusses tools and concepts libraries will embrace in a networked world, including new opportunities for library relevance in bookstore/textbook operations, compliance, library/archival/museum functions, e-publishing, and tutorial services Offers a thorough examination of the virtual library infrastructure crucial for an online learning program, with a special look at the particular needs and responsibilities of online librarians Looks at the evolving relationship between higher education and copyright, and posits how educational technology will bring further changes Bursting with stimulating ideas and wisdom gleaned from first-hand experience, Stielow's book presents a model for offering outstanding higher education library services in an increasingly online environment. The digital age has transformed information access in ways that few ever dreamed. But the afterclap of our digital wonders has left libraries reeling as they are no longer the chief contender in information delivery. The author gives both sides--the web aficionados, some of them unhinged, and the traditional librarians, some

blinker--a fair hearing but misconceptions abound. Internet be-all and end-all enthusiasts are no more useful than librarians who urge fellow professionals to be all things to all people. The American Library Association, wildly democratic at its best and worst, appears schizophrenic on the issue, unhelpfully. "My effort here," says the author, "is to talk about the elephant in the room." Are libraries obsolete? No! concludes the author (also). The book explores how libraries and librarians must and certainly can continue to be relevant, vibrant and enduring.

The eBook Revolution: A Primer for Librarians on the Front Lines

E-book vendors continue to experiment: adjustments to business models, consolidation of content, and mergers with competitors mean constant change.

What's good for innovation can equal confusion when it comes to choosing an e-book platform for your library. Making a sound purchasing decision requires research and close consideration of trade-offs, and Roncevic's new issue of Library Technology Reports will get you started. Based on surveys of e-book vendors with an established presence in academic, public, and/or K-12 library markets, this report includes Background and business model descriptions for 51 leading e-book vendors Four tables comparing content, technical specifications, functionality, and business models An at-a-glance overview of platforms, including vendor website URLs Bulleted checklists of factors to consider, and questions to ask vendors An examination of the blurring channels of publisher, aggregator, and distributor platforms, with advice to help you avoid content overlap

Literacy and Reading Programmes for Children and Young People: Case Studies from Around the Globe presents interviews with over 40 librarians from

around the world who tell of their library programs. The volumes are arranged geographically with Volume 1 offering interviews from library professionals from the USA and Europe, and with Volume 2 sharing programs from Asia, Africa, Australia, and the Middle East. The volumes highlight the diversity of the types of programs catering to the varying needs of children and young adults throughout the world. Case studies featured in this book outline the details of programs, events, and activities provided by over 40 organizations in the context of social capital and social inclusion. Each interview chapter discusses the contributions made to literacy development and community building of children and teens. With the many variations and examples of best practice, librarians and educators can glean new ideas for their own programs. The interviews reveal the challenges and issues faced and the work being achieved in vastly different environments, in many geographic areas, and in diverse economic, social, and cultural contexts. The programs include those of national and state libraries, public libraries, and mobile libraries carried out by public libraries, NGOs, and commercial organizations in both developed and developing countries. They also feature programs of multicultural libraries, libraries for indigenous people, and libraries for refugees. This publication complements the range of initiatives and activities carried out by IFLA's Libraries for Children and Young Adults Section that supports library services and reading promotion initiatives catering to children and young adults around the world. These volumes are rich in variety and will provide much food for

thought for creating unique and successful library programs.

*Literacy and Reading Programmes for Children and Young People: Case Studies from Around the Globe
Are Libraries Obsolete?*

Pennsylvania School Journal

Charleston Conference Proceedings, 2011

Branding provides a unique way for a library to distinguish itself: its identity, personality, and image. Drawing on five vividly unique case studies from libraries across the country, *Breakthrough Branding: Positioning Your Library to Survive and Thrive* shows how to mesh your library's brand deeply and seamlessly within your internal culture, to leverage and better position your brand for the audiences you serve, and develop and implement promotional strategies and tactics consistent with your objectives. Experienced marketers and branding consultants Suzanne Walters and Kent Jackson offer clear advice regarding the art and science of library branding, advocacy, ethical considerations, marketing management and evaluation throughout the book's three sections: "Branding" explains what a brand is and how to assess, develop and utilize your brand as an important institutional asset, with insider tips on environmental scanning, market research, and situation analysis; "Positioning" leads you through the process of effectively addressing your target audiences;

“Promotion” helps you develop an integrated marketing communication strategy, including how to craft on-target messages, leverage your online presence to inform and engage with community members, and capitalize on traditional marketing channels, with guidance on public relations, event strategies, email, websites, and more. Here, the author assesses our modern book culture by focusing on five key elements including the explosion of retail bookstores like Barnes & Noble and Borders, and the formation of the Oprah Book Club.
