One of those rare cases in  
which the movie was much  
better than the book.

Technically it was well  
written, but it was just  
jarring that the father  
insisted that his son wear

baby clothes and play with rattles when he was apparently an old man, and family members insisted that he was aging in reverse on purpose and could stop if he wanted to.

Maximum file size is a  
subjective thing. Consider  
the time it will take to  
restore the file/filegroup  
in case of a disaster and

then maybe split into multiple filesgroups for faster, more targeted recovery. Actual size has no bearing on workload performance though.

Importance of data file size management - Paul S. Randal  
The Curious Case of... a truncated log file after a revert from snapshot; 2019 review: the year by the numbers; 2019: the year in books; Wait statistics workshop at SQLBits in London 2020 - finally! Calling all user group leaders! We want to present for you in 2020! The Curious Case of... the failing SQL Server 2019 install

Limiting error log file size  
in SQL ... - Paul S. Randal  
This is because the default  
log file size is the higher  
of 0.5MB or 25% of the sum  
of the data files created.  
In this case, the data file  
is copied from the model  
database, and I made it  
larger when I created the  
BigRows table, so the log  
file of the new database has  
to be slightly larger.

Initial VLF sequence numbers  
and default log file size

Tom Cruise and Brad Pitt may team up again, this time sans vampires. The two megastars worked together in 1994's Interview With a Vampire and may meet up again 20 years later, if 20th Century Fox can bring Pitt to a 60s-era racing

movie that already has  
Cruise signed on (along with  
Oblivion director Joseph  
Kosinski). The movie, Go  
Like Hell, is based on A.J.  
Baime s book, Go Like Hell  
...

I'd more likely use 1.5, but  
1.75 shows the idea better.  
Of course watch out for  
overflow, and particularly  
any multiple of the previous  
size may overflow when the  
actual size doesn't. If your  
file size is  $(2^{31})-1$ , this  
will probably attempt to  
allocate a buffer with  
 $-(2^{31})$  rather than  $2^{31}$

bytes. - Steve314 Nov 13 '16

How can I get a file's size  
in C? - Stack Overflow  
30 6,13,7 <unavailable> 2700  
31 6,13,7 <unavailable>  
2700. There are 32 cores in  
the computer. A 100% CPU  
usage of a single core by a  
process would be showed in  
the CPU column in Task  
Manager as  $1 / 32 \times 100$ .  
This equals to 3.125%.  
However, in this case the  
service process consumes  
roughly 95.15% of a single  
core.

Hi Paul. I've read this post and your article in Technet Magazine and i have one doubt: I've read about write-ahead logging in books on line and it says that all log registers are written to a log cache before going to disk in the log files.
