Identification Key For Benthic Diatom Slibforyou

Introduction. Diatoms are the most dominant taxa among the various microalgae and are known to account for ca. 40% of the total primary production in the ocean [1, 2]. Diatoms also play an important role in the biogeochemical cycles of carbon and silica []. In tidal flats, especially, benthic diatoms are the most dominant and diverse group and are key organisms that contribute to the ...

Identification of benthic diatoms isolated from the ...

Illustrated keys to the genera of diatoms found in benthic habitats in the UK are provided, along with guides to the identification of the most common species within larger genera. Notes on sampling and laboratory preparation are also provided along with comments on the ecology and environmental preferences for many of the taxa described.

Identification of Common Benthic Diatoms in Rivers | NHBS ...

The first version included, in addition, a simple key to benthic diatoms (one constraint on adoption of diatom-based methods before this was the absence of user-friendly identification guides).
