

Madras The Land The People Their Governance

India, over the decades, has experienced multiple changes, including population explosion, urbanisation, technological advancement, commercialisation of agriculture, change in land-use pattern, vast improvement of infrastructure facilities, etc., which have had an impact on the environment. Author Velayutham Saravanan attempts to understand the complexity of the environmental history of contemporary India from the early nineteenth to the early twenty-first centuries. Environmental History of Contemporary India begins with an analysis of land-use patterns and population and their impact on the environment. Further, it discusses the exploitation of natural resources for commercial motives by the colonial administration and argues that the colonial commercial policy of over one-and-a-half centuries had impacted the ecology and environment. The book also deliberates whether the postcolonial government policies have changed in favour of environmental protection or have continued with the colonial policy, and attempts to throw light on the issues of how the land for development policies have impacted the environment from the early nineteenth century until recent years. It then looks at the problem of electronic waste and its adverse impact on the environment, ecology and health in a historical manner while engaging with the complexity of the conflict between land and population in relation to the environment. The book is the most comprehensive presentation on land, population, technology and development that India has witnessed since the early nineteenth century.

Regional Evolution in India Since 1850

Environmental History of Modern India

This book explains how access to and use of land, water and language helped shape Andhra politics in India from 1850 down to the present day. After independence, the debate over land reform and policies on irrigation has shaped the for governments, while the debate over the make-up of the language-based state has stimulated separatist movements like the one in support of Telangana. The book discusses how British innovations in irrigation in coastal Andhra in the mid-

transformed the economy there from food crops to cash crops, and created new markets for local entrepreneurs. This stimulated increased education and social reform in the region, which in turn supported new politics in search of const

The drive for a Telugu language-based province then arose in concert, and those political resources were then used to determine local patterns down to independence. The 1930s ruse of the socialists, then the communist organisations, w

land and water tax debates, which impacted the political nature of development — both before and after — independence. This is one of the first books on Andhra that recounts this story and is based on extensive archival research explor

relationships between land, water, language and politics. It would be of primary interest to those studying modern nationalism in India, natural resource management, Indian politics and economic growth.

The Bibel of Every Land. A History of the Sacred Scriptures in Every Language Etc

The last two centuries have witnessed profound changes in the nature of public consciousness. Nowhere has this been more true than in India, especially in relation to changing cultures of

public life and religious tradition in South India. Essays in this collection attempt to explore the intricacies of what is perhaps the single most complex socio-religious environment in

the world. The essays consider the evolution of the notion of Hinduism as a distinct and singular separate religion; the relationship between this kind of formulation and various European

or western influences in India; and differences which the formation of this idea and its acceptance have made upon wider public consciousness. Each essay also considers certain general

issues - such as the passing along of religious authority from one generation to the next, and the rise of disputes over matters both ideological (or doctrinal) and institutional, disputes

that are fundamental to the traditions concerned and yet have unmistakable cross-cultural references.
