

# My Bombsight View Of Wwii

The Norden Bombsight was originally developed by the US Navy prior to World War II as a means to drop bombs more accurately. It had proven to be superior to the Sperry model and expectations were high that it would facilitate precision bombing of industrial facilities, destroying the enemy's ability to continue fighting.

A bombsight is a device used by military aircraft to drop bombs accurately. Bombsights, a feature of combat aircraft since World War I , were first found on purpose-designed bomber aircraft and then moved to fighter-bombers and modern tactical aircraft as those aircraft took up the brunt of the bombing role.
