Fluid resuscitation in PALS depends on the weight of the child and the severity of the situation. While dehydration and shock are separate entities, the symptoms of dehydration can help the provider to assess the level of fluid deficit and to track the effects of fluid resuscitation.

PALS Study Guide - National CPR Association

Asystole is the “flatline” on the ECG monitor. It represents a lack of electrical activity in the heart. It is critically important not to confuse true asystole with disconnected leads or an inappropriate gain setting on an in-hospital defibrillator. Asystole may also masquerade as a very fine ventricular fibrillation.
