*End of Heaven? Quantum science says you ALWAYS have ...*

"Science and Creation" is the first systematic probing into perhaps the most puzzling, but least discussed fact of cultural history: the birth of science. Cultural history abounds in parallel achievements, but it happened only once, between 1250 and 1650, that rudimentary science turned into a self-sustaining enterprise.

life concern various scientific, philosophical, and theological disciplines. Although any discussion of evolution and creation requires insights from each of these three areas, it is not always easy to keep these disciplines distinct: to know, for example, what is the appropriate competence of each field of inquiry.
